**Offence Supportive Cognition as a Contributory Factor in Sexual Offending**

**Ashling Bourke** - Trinity College, Dublin - **UK**

**Emily Blake** - Researcher - **UK**

This illustrated, interactive guide offers a theoretically coherent, practice-based account of the application of attachment theory in working with any adults including those who pose a risk to themselves or to other adults or children. Its approach to the application of attachment thinking complements rather than competes with existing therapeutic methods.

By integrating audio, visual and written information around five characters and their attachment-based stories, the multimedia guide brings attachment theory to life in a conceptually clear but dynamic, engaging and hands-on way.

The resource provides frameworks and tools to enhance the capacity of practitioners to relate to their clients in attuned and containing ways that improve the effectiveness of their practice.
